

## **Say Happy Mother's Day with Special Pricing on Cosmetic Treatments at Dr. Mariano Busso's Office**

*South Florida's leading cosmetic dermatologist and dermal filler expert extends celebratory savings across popular treatments, including Botox® and Juvéderm®*

Miami, Florida ([PRWEB](#)) May 09, 2017 -- The hunt for the perfect gift for mom is over. For a limited time, Cosmetic dermatologist, Dr. Mariano Busso M.D., is offering substantial coupled discounts on cosmetic enhancements at his recently renovated Coconut Grove office. Both patients and their mothers can save on any one aesthetic treatment just before the summer season, including Dr. Busso's renowned dermal filler technique and Botox wrinkle reduction treatments.

Dr. Busso is a board-certified dermatologist and prominent expert in the field of dermal fillers and Botox injections. Using only the most groundbreaking approaches learned through his 30+ years at his private practice, he has a firm grasp on the best methods for effectively identifying and treating skin-related grievances.

Dr. Busso is a medical mentor for Botox, assigned in training top-rated physicians across the country on his techniques. As the most common nonsurgical cosmetic treatment worldwide, Botox injections are proven effective in minimizing the appearance of facial wrinkles. Botox also aids in premature aging prevention by immobilizing commonly overworked muscles that cause unpleasant creases and crinkles later in life.

Patients and their mothers can also save on hyaluronic dermal fillers such as Juvéderm, an innovative way to help smooth wrinkles and folds with results lasting up to two years. Juvéderm Voluma XC is used in lip augmentations and facial contouring, among the numerous minimally-invasive esthetic improvements available. Juvéderm is the first dermal filler approved by the U.S. Food and Drug Administration (FDA) shown safe and effective for people of color.

Another popular treatment this time of year is VANQUISH M.E., a revolutionary fat reduction and body contouring device with clinically-proven results of up to six inches lost. Recent research comparing BTL Vanquish M.E. to its predecessor, Vanquish, reveals a 53 percent decrease in fat layer and improved results consistency. Both devices use multipolar radio frequency to gently heat fatty tissue at the skin's surface, requiring no surgery or scarring to attain a slimmer, sculpted physique.

Until May 19, enjoy a \$75 discount on any upcoming cosmetic treatment of \$300 or more. This deal cannot be combined with other offers or specials. To book a Mother's Day duo treatment with special pricing, call Dr. Busso's office at 305-857-0144 today and mention this press release, or bring the attached card to your next appointment.
